## Accudata Twice the Tech Titan

*Extreme Revenue Growth Places Accudata Technologies Among Business Council 25 Fastest Growing Technology Companies in Metroplex*

**ALLEN, Texas — Aug. 23, 2004** — As many high-tech companies are enjoying more fruitful times, Accudata Technologies is outdistancing the competition in the recovery effort. The company has been named to the DFW Metroplex Technology Business Council's prestigious list of the fastest growing technology companies in both the one-year and five-year categories. Rankings are based on fiscal year revenue growth over the one-year period of 2002-2003 and the five-year period of 1999-2003.

Accudata President and CEO, Greg Smith attributes a commitment to unparalleled technology and unique service offerings as the reason for the company's 118 and 186 percent respective increases over both periods.

"We are the only company that does what we do," Smith said. "Through innovation, and employee perseverance, Accudata has found a niche in the marketplace. Being honored for the second year along side so many incredible companies speaks for itself. We will continue to use our data validation technology to meet the wide spectrum of customer needs."

With a ranking of nine in the one-year category and 25 in the five-year category, Accudata automatically will be entered in Deloitte's Technology Fast 50 program, which ranks the fastest growing technology companies in the Texas Crescent—Austin, Dallas-Fort Worth Metroplex, Houston and San Antonio. To qualify, a company must have had operating revenues of at least \$50,000 in 1999 and \$1,000,000 in 2003. The company also must be headquartered in Texas and be considered a "technology company" — defined as a company that produces technology, manufactures a technology product or devotes a high percentage of effort to research and development of technology.

This year's top spots went to Valere Power in the one-year category and Handango Inc. for five-year growth. Other notable winners this year include Terion Inc., Retractable Technologies and C I Host. This is Accudata's second year in a row on the Fast Tech 50 one-year performance list.

## **About Accudata Technologies**

Accudata Technologies, originally founded as Revenue Communications Inc. (Revcom) in 1989, provides flexible access to data validation through innovative approaches to data transmission. The company serves as an access hub for validating information associated with telephone numbers. Its validation services include translating information between diverse protocols such as SS7, PSTN and IP in order to access local number portability and line information databases (LIDBs), billing name and address information and bankcard transaction verifications. Additional information regarding Accudata can be found on the company's Web site: [www.accudatatech.com](http://www.accudatatech.com).
